This Year is pregnant with a Quaternion of ECLIPSES of the two great Luminaryes, The first whereof may be conspicuous in our Hemisphere, which is of the Sun neer his Exalt. in Aries, the first Sign of the fiery Triplicity, the Last day of *March*: Beginning 50 *m* after 12, and ending 12 min. after 3 after noon: The total duration whereof will be 2 houres and 22 min. and about two thirds of the Sun Eclipsed.

The Second Eclipse will be of the Moon. April the 15: about 6 a clock at night, at which time unto the Inhabitants of Hungary, Dalmatia, and Polonia, neer half her body will be obscured.

The third is of the Sun the 24 day of *September*, about 1 in the afternoon, Formidable to the New-Zealanders and such as shall Sail in the Pacifick Sea, but by reason of the Moons Southern Latitude to us invisible.

The fourth and Last is of the Moon, the 9 day of October, about 7 in the morning: At which time two thirds of her body will be Eclipsed.

☉ in ♈ ♉ ♊ Earth enters ♎ ♏ ♐ March 9 day 17 *h* 12 *m*

And banish darkness from the Cloudy Skyes,
And having won and worn the Golden Fleece
Will promise unexhausted Springs of Peace:
But yet in's HORNED forehead you may read
That now the Queen of heav'n is Queen indeed,
Whos's Face shall screen the Earth fro's scorching Ray,
And so this *Equal* moneth shall *March* away.

Now such as all their food to Labour owe
The rugged Earth and Surging Sea must plow:
The Farmer joye's when he (his Labour ended)
With Showrs of Blessing; see's his toile attended,
Fair Winds on Seamen, work the same effect
When to the Hav'n, their course clear Heav'ns direct.
But first i'th' Cloded Earth the Seed must dy,
Or 'twill not to the Ploughman multiply.

THe noble Ships, which the vast Ocean try,
And nothing neer them see, but Sea and Sky,
Now homeward with their Wings advance apace,
And having periodiz'd their restless race:
The Merchants house will fill with plenteous Store,
But Silver Angels onely ope' the dore:
The Sun from th'Lyon now will make retreit
In truth 'twould joy a blind man much to see it.

BY Planets Vote this sound surrounds the Sky,
The Garland giv'n must be to *Mercury*:
When to the Peerless Sun (who scorners scorn's)
The Dog shall shew his heels, the Moon her horns:
To all (but Doctours now the seeds of Woe)
May luck be sown, by such sweet fruits as doe
First give an Inamour'd eye a pleasant taste
And then between the watering teeth are plac't.

The Golden Talent of our time to weigh
Whereof each moments value far surmounts
All Finite numbers and conceiv'd accounts;

His Springing Seed who did neglect to sowe,
Wheris the Prudent Farmers constant care
Provides enough to spend and some to spare.

WHite Winter now our loss of heat repairs
With th'New years Guift of clear & healthy fires
A cleanly Dish Indeed! (and so't had need)
Whereon each minute every man must feed.
And now the Potent Blasts of *Mercury*,
Will chain the Northern Seas and Surges high,
And each confine unto his proper seat
While living Springs retaine their native heat.

FEBRUART hath xxix dayes.

SOL ended hath this YEAR: But not his Race,
But thither whence he came, He speeds apace.
Seed time and Harvest shall with Cold and Heat
(While th'Earth endures) retain their proper seats:
So neither Winter nor shall Summer miss
Their wonted Courses: And a Time there is
All *Sublunary* Labours to begin,
Except (which every day we do) to *Sin*.
O'th large Extent of Time this Year hath shown,
The Instant only can we call Our own.
